

Titan Perforating Division **Competitive Advantage** ***Tubing Conveyed*** ***Perforating (TCP) Tools***

Safety – Tools comply with API RP 67 guidelines for design, testing and application.

Advanced Engineered for Quality – Engineered with over 25 years of TCP design, manufacturing and field application.

Versatility – One firing head can fit all sizes by changing several components. Low pressure & high pressure tools can be converted by changing a minimum number of hardware components.

Cost Effective – Designed for reusability, they can be easily redressed by replacing a minimum number of components after use, making the tools very cost effective.

Stability – Another high quality, cost effective product for your completion needs from Titan Specialties, Ltd., your Worldwide Solution provider since 1966.
